Graduation and Retention Rates by Program

2024

Prepared by The Office of Institutional Research and Studies

## Study Methods

The Graduation and Retention Rates by Program reports present program success rates for the last ten academic years. The study includes undergraduate students who first declared their major in the academic year specified. Students of any class level, including those working toward a second baccalaureate degree, are included. The program success rate is calculated as the number of students who graduated in the program plus the number of students who remain enrolled (retained) in the program.

Students were assigned into program cohorts based on the academic year in which they initially declared and enrolled in their major. They were then tracked within their program through subsequent academic years to determine the program success rate (graduation plus retention rates) at year 2, year 4 and year 6. Within each program cohort, students were further categorized into first-year or transfer groups based on their original admission into the University.

Graduation rates displayed are cumulative, meaning the rate for Year 6 includes students counted for Year 4 and Year 2 rates. The reports also include the SIUE Graduation rate at Year 6. This rate includes both students in the program graduation rate and students who changed majors and were awarded an SIUE undergraduate degree in a different program. Retention rates are based on retention in the year displayed only, and students included in the graduation rate are not included in the retention rate. Programming changes or code corrections in the Banner student information system may result in small headcount differences from previous studies.

These reports rely on a custom data set developed with the assistance of SIUE's department of Information Technology Services. The credit hours required to graduate for each program were obtained from the Undergraduate catalog.
